Creating an air tight seal on a wire wheel can be somewhat difficult, making the use of inner tubes necessary and, to prevent the inner tube chaffing against the spoke nipples, the fitting of a rim band is highly recommended.

Headlamp kits - HID H4 conversion

HID (High Intensity Discharge) headlamps are a breakthrough in vehicle lighting technology and are found in many current production cars. Now classic cars can benefit from this technology with this HID bulb conversion kit exclusively from Moss Europe.

• Higher light output - up to 3 times brighter than halogen
• Safer night driving - brighter light with improved range
• Nominal 3.5 amp draw when on, ideal for dynamo equipped cars
• Longer lasting bulbs - at least 6 times longer than halogen

Fitment note: This kit does not include the headlamp units. If your car is already fitted with H4 halogen headlamps, this kit is a direct fit. However, if your car is fitted with sealed beam units, P45 or other types of headlamps you will need to purchase an H4 halogen conversion separately. Negative earth only. For more information, please check our website. HID bulb kits are sold for off road use only.

The single relay kit can also be used for wiring spotlight, horn and other electrical accessories.

Vinyl, double duck and mohair hoods

The hoods supplied by Moss are made on jigs matching those used by the factory. The vinyl used is from the same supplier that supplied the Triumph factory. These are the closest you will get to an original hood in terms of fit and appearance.

Mohair was the original material used on the Triumph Stag, it gives a high quality, fade free look but can be more difficult to fit as it has less stretch than vinyl based materials. Double duck is a canvas based material which whilst being durable, is prone to fading in direct sunlight and can develop a milky white tinge. All mohair and double duck hoods have their windows sewn in.
